

## Statistics Seminar

Topic: On Being a Statistician in a Medical Center  
Environment

Speaker: Dr. Warren May  
University of Mississippi Medical Center, Jackson

### Abstract:

The Medical Center environment offers some unique and challenging opportunities for those in the Statistical Sciences that are quite different from the experiences of those in industry, government and more traditional academic environments. We present some observations and experiences that will help students understand the role of the statistician as a collaborative investigator in a Medical Center environment.
