Time/Place: M W F 1:00-1:50pm; Hume 113

DESCRIPTION:

This course is an introduction to statistics for students in mathematics, engineering and computer science. We will cover the following topics: descriptive statistics, basic probability with coverage on Bayes rule and application to reliability analysis, random variables, common distributions including Binomial, Poisson, Exponential, Normal and t distribution, Central Limit Theorem, large/small sample confidence intervals and hypothesis tests, simple linear regression with emphasis on model diagnostic procedures. Statistical software R will be implemented for demonstration of statistical methods. One-semester calculus background is assumed.

LEARNING OBJECTIVES:

After completing this course, students enable to

- Understand basic probability concepts and probability models;
- Know which statistical method is appropriate given a typical problem;
- Apply statistical procedures to data and interpret results;
- Have familiarity with Statistical Software R;
- Enhance critical statistical thinking.

GRADE INFORMATION:

- Class attendance – Attendance is mandatory.
- Homework – There are 11 online assignments totally worth 30% of the course grade.
- Tests – There are 2 midterm exams each counting for 20% and a final exam counting for 30%. The test dates are listed below. No make-up tests will be given except in cases of verified emergencies.

A 93-100%	A- 90-92%	B+ 87-89%	B 83-86%	B- 80-82%
C+ 77-79%	C 70-76%	D 60-69%	F below 60%	

ACADEMIC CONDUCT AND DISCIPLINE:

Students are expected to adhere to the University of Mississippi Creed and the Standards of Honesty as described in Policy Code ACA.AR.600.001 and written in the M Book. If you violate the Standards of Honesty, you will be reported and subject to the appropriate sanction which may include expulsion from the University.

TENTATIVE AGENDA: If changes are made, you will get advance notification in class.
