

Combinatorics Seminar

Monday, March 4, 2013

3:00 pm in Hume 331

Dr. James Shook

The National Institute of Standards and Technology

Math at the National Institute of Standards and Technology

ABSTRACT

In this talk, I will give a brief tour of NIST and its missions. The discussion will then turn to some of the math problems that the Applied and Computational Mathematics Division encounter. I will end the talk by describing both undergraduate and post-doctoral opportunities at NIST.

All students are welcome!!!
