

# **Pi Mu Epsilon And Society of Physics Students**

**Tuesday, April 21, 2015  
12:15-12:55 PM in Hume 101**

**Relating Mathematical Studies to life applications**

**Jo Howard**

**Jo Howard graduated from the University of Mississippi with degrees in mathematics in 1967. She has since worked on applying mathematics to a number of fields including: designing trajectories for Boeing that put a man on the moon in 1969, programming the space simulator in Houston, Texas, and data management systems in the oil and gas industries.**

**Come join us for lunch and Jo Howard's talk this Tuesday!**
