

MATH 121, College Algebra, v1 IS
University of Mississippi
3 credit hours

INSTRUCTOR INFORMATION:

Instructor name:

Michael Azlin

Office: Hume Hall, Room 218

CONTACT INFORMATION:

If you have questions concerning the content of the course, you may contact me directly using the Email Your Instructor link on the Lessons page. NOTE: Whenever sending email, please be sure to indicate your course title and number in the subject line.

For lesson or test administration issues, please contact the iStudy department:

The University of Mississippi, Department of
Outreach and Continuing Education

iStudy

P.O. Box 1848

University, MS 38677

Phone: (662) 915-7313, toll-free (877) 915-7313

Fax: (662) 915-8826

E-mail: istudy@olemiss.edu

COURSE DESCRIPTION:

This is a 23-section Independent Study course in Algebra! The course is self-paced and entirely online. Topics include linear, quadratic, rational, and radical equations. Other topics consist of inequalities, the algebra of functions (including polynomial, rational, exponential, and logarithmic functions), the graphs of some of these functions, and systems of equations in two variables.

TEXTBOOK INFORMATION:

Required Software + eBook Bundle: *College Algebra: A Concise Approach*, by Paul Sisson; **ISBN:** 9781941552773

[Hawkes Learning Systems](#)

Instructor Name: iStudy Algebra (Note, although I am your instructor, the listing on Hawkes is iStudyAlgebra!)

Section Name: iStudy--Your last name, first initial--date of course enrollment

The ISBN above is for the required Software + eBook Bundle. The eBook (digital textbook) and software are good for life. **DO NOT** purchase a used License Number or Access Code (from other students or online vendors), as License Numbers and Access Codes are registered to the original purchaser only. You **should not** download and install anything; follow the instructions on Blackboard for enrolling in the Hawkes portion of the course. For those who may want a “physical” book, it is suggested that you use either: *College Algebra, 2nd Edition*, by Paul Sisson; ISBN: 9781932628272, or *College Algebra: A Concise Approach*, by Paul Sisson; ISBN: 9781935782025. Both of these are usually under \$10 on Amazon.

It is your responsibility to obtain the software and eBook for this course.

Use the ISBN number in this syllabus to make sure you get the **exact** software bundle required in this course.

COURSE OBJECTIVES – STUDENTS WHO SUCCESSFULLY COMPLETE MATH 121 WILL BE ABLE TO:

- Solve linear, rational, and radical equations in one variable.
- Solve quadratic and higher order polynomial equations using a variety of methods; graph these functions.
- Write the equation of a line in various forms, as well as find slope, intercepts, and graph linear equations.
- Evaluate, combine, compose, and find inverses of functions; determine the domain of a function.
- Divide polynomials using long division and synthetic division, and determine zeros of polynomial functions.
- Find equations of vertical, horizontal, and oblique asymptotes of a rational function.
- Solve linear, polynomial, and rational inequalities in one variable.
- Solve logarithmic and exponential equations; solve application problems with exponential functions.
- Set-up and solve systems of equations in two variables using the substitution and elimination methods.

COURSE OUTLINE:

UNITS	Blackboard and Hawkes Material	Due for Grades
1	2.1a Linear Equations in One Variable 2.2 Linear Inequalities in One Variable 2.3 Quadratic Equations in One Variable 2.4 Higher Degree Polynomial Equations	Hawkes assignments
Quiz 1	Non-proctored Quiz in Hawkes. You have unlimited number of attempts at 90 minutes per attempt. Only your best score will count. You must score at least 80% on this quiz to enable the next section.	Quiz
2	2.5 Rational Expressions and Equations 2.6 Radical Equations 3.2 Linear Equations in Two Variables 3.3 Forms of Linear Equations	Hawkes assignments
Quiz 2	Non-proctored Quiz in Hawkes. You have unlimited number of attempts at 90 minutes per attempt. Only your best score will count. You must score at least 80% on this quiz to enable the next section.	Quiz
3	3.4 Parallel and Perpendicular Lines 4.1 Relations and Functions 4.5 Combining Functions 4.6 Inverses of Functions	Hawkes assignments

Quiz 3	Non-proctored Quiz in Hawkes. You have unlimited number of attempts at 90 minutes per attempt. Only your best score will count. You must score at least 80% on this quiz to enable Course Exam 1.	Quiz
Practice Exam	Non-proctored and untimed practice exam in Hawkes for bonus points with unlimited attempts (best score counts).	Practice exam
Course Exam 1	Proctored course exam in Hawkes with a two-hour (120 minute) time limit. This exam must be submitted to enable the next section.	To be scheduled and completed before proceeding
4	4.2a Linear and Quadratic Functions A.1 Introduction to Polynomial Equations and Graphs (excluding complex numbers) A.2 Polynomial Division and the Division Algorithm (excluding complex numbers)	Hawkes assignments
Quiz 4	Non-proctored Quiz in Hawkes. You have unlimited number of attempts at 90 minutes per attempt. Only your best score will count. You must score at least 80% on this quiz to enable the next section.	Quiz
5	6.1a Rational Functions 6.1b Rational Inequalities 7.1 Exponential Functions and their Graphs 7.2 Applications of Exponential Functions	Hawkes assignments
Quiz 5	Non-proctored Quiz in Hawkes. You have unlimited number of attempts at 90 minutes per attempt. Only your best score will count. You must score at least 80% on this quiz to enable the next section.	Quiz
6	7.3 Logarithmic Functions and their Graphs 7.4 Properties and Applications of Logarithms 7.5 Exponential and Logarithmic Equations 8.1 Solving Systems by Substitution and Elimination	Hawkes assignments
Quiz 6	Non-proctored Quiz in Hawkes. You have unlimited number of attempts at 90 minutes per attempt. Only your best score will count. You must score at least 80% on this quiz to enable the Course Exam 2.	Quiz
Practice Exam	Non-proctored and untimed practice exam in Hawkes for bonus points with unlimited attempts (best score counts).	Practice exam
Course Exam 2	Proctored course exam in Hawkes with a two-hour (120 minute) time limit. This exam must be submitted to enable the Final Exam.	To be scheduled and completed before proceeding

Practice Final Exam	Non-proctored and untimed practice exam in Hawkes for bonus points with unlimited attempts (best score counts).	Practice exam
Final Exam	Proctored comprehensive final exam in Hawkes covering material from both midterms. There will be a two-hour (120 minute) time limit on the final exam.	To be scheduled and completed before proceeding

GRADING:

GRADING SCALE

Grade	Percentage Necessary
A	93
A-	90
B+	87
B	83
B-	80
C+	77
C	70
D	60
F	Below 60

GRADING INFORMATION:

The grading format is as follows:

- Homework Average = 10%
- Quiz Average = 15%
- Course Exams 1 and 2 = 20% each (40% total), (Note: The lower of the two course exam percentages will be replaced by the final exam percentage if the final exam percentage is higher.)
- Final Exam = 35%
- Practice Exam Average = 5% Bonus

Note: Grading calculations are done automatically in Hawkes.

You can do hypothetical grade simulations with the following formula:

$$\text{Course Average} = 0.1 * (\text{Homework Avg}) + 0.15 * (\text{Quiz Avg}) + 0.2 * (\text{Course Exam 1}) + 0.2 * (\text{Course Exam 2}) + 0.35 * (\text{Final Exam}) + 0.05 * (\text{Practice Exam Avg})$$

Remember, in the formula above, the lower of the two course exam grades will be replaced by the final exam grade--if the final exam grade is higher (thus the final has the potential to be worth 55% of your overall grade).

FAILURE TO TAKE THE FINAL EXAM WILL RESULT IN FAILURE OF THE COURSE

TESTING INFORMATION:

A student who wishes to receive credit for an Independent Study course must take all required exams under the supervision of an approved test site official (a proctor). iStudy has a testing facility ([DETL](#), the Distance Education Testing Center at UM) to proctor tests for students in the Oxford area. Students near Tupelo, Southaven, Grenada or Booneville can use our regional campus testing centers. Other students are allowed to take tests from any approved 2 or 4 year college or university. Testing centers and public libraries can also serve as proctors, but K-12 schools are not acceptable. More information is available [on the iStudy website](#). If you are testing in Oxford, you need to submit a test application via Register Blast. The link to Register Blast can be found at the [iStudy website](#). If you are not testing in Oxford, you need to submit an online test application via the [iStudy website](#).

NOTE:

- It is the student's responsibility to contact a proctor and schedule a testing appointment for each and every test he/she is required to take.
- It is the student's responsibility to provide Independent Study at Ole Miss with his or her proctor information at least seven (7) days before the examination window opens.
- If you are unable to use one of the proctors on the list, you are still responsible for locating a proctor for each and every test.

ADDITIONAL INFORMATION:

CALCULATORS

Only non-graphing calculators are allowed for the proctored testing in this course. It is suggested that you use a non-graphing calculator for all other work so that you are acclimated come test time. The suggested calculator for use is the TI-30XS Multi-View, and that model of calculator will be provided at the Oxford testing center.

HOMEWORK

- Homework is assigned for each of the sections covered (23 total), and it will count as 10% of your overall grade.
- Homework assignments may be done on any computer connected to the internet using Hawkes.
- Read through the “Learn” mode (or the eBook for a deeper presentation) of each section (watch the videos and slide presentation!).
- Work through the “Practice” mode of each section (utilize the tutor tab when needed!).
- When you have gone through “Learn” and “Practice,” complete the assignment in the “Certify” mode.
- **In order to receive credit for homework it must be done in the “CERTIFY” mode.**
- Each “Certify” assignment contains the same questions as the “Practice,” but in random order.
- **Each assignment is an “all or nothing” proposition. That is, you have to answer each and every question in an assignment correctly in order to “Certify” and receive credit for that assignment.**
- You have an unlimited number of attempts at each question as long as you do not accept a “Strike.”
- Accepting a “Strike” for an incorrect answer in the “Certify” mode will force you to restart the assignment from the beginning, so always select “Try Similar Question” after an incorrect response (unless you just want to start anew).
- **A section must be certified before the succeeding section will open.**

- There are six assignments (1.1, 1.2, 1.3a, 1.4a, 1.4b, 1.5) that are “bonus” homework assignments. These sections cover topics that are not taught in this class, but they are topics that you should be very familiar and comfortable with. You are strongly encouraged to do these assignments. Completion of these assignments can add 20% to your homework grade (2% to your overall course grade, depending on how many you complete). There is no requirement to certify any of these to proceed.
- You should keep a “homework” notebook of all problems worked.

QUIZZES

- Your quiz average will count as 15% of your overall grade.
 - There are a total of six (6) quizzes during the course.
 - Quizzes may be done on any computer connected to the internet using Hawkes.
 - Quizzes have a 90-minute time limit, but they are not proctored.
 - You have an unlimited number of attempts at each quiz, with only your best score recorded.
 - Questions will be similar in format to the homework problems.
 - You must score at least 80% on any quiz to move to the next lesson in the sequence.
-

PRACTICE EXAMS

A practice exam has been created for each of the course exams and for the final exam. Like the homework, these practice exams are VERY useful and powerful tools. The practice exams are built from the quizzes. Each course exam and the final exam will be built directly from its respective practice exam. It is suggested that you work EACH of them prior to the actual exam. In addition to gaining essential practice, you will receive BONUS POINTS based on your practice exam scores.

- There are a total of three (3) practice exams in the course.
 - Practice exams are not proctored.
 - Questions will be similar in format to the homework and quizzes.
 - Practice exams may be done on any computer connected to the internet using Hawkes.
 - You have an unlimited number of attempts for each exam, with only your best score recorded.
 - Your practice exam average can add up to five (5) percentage points to your overall course grade.
-

MIDTERM COURSE EXAMS

- There are two (2) course exams during the semester.
- Each course exam is built from its respective practice exam.
- The course exams have a two-hour (120 minute) time limit on each exam, and they are proctored.
- The Course Exam 1 will cover all material up to that point, and Course Exam 2 will cover all material since Exam 1.
- Course exams will be taken on a computer using Hawkes at a proctoring site.
- You must arrive at the correct answer to receive credit. Partial credit will only be awarded in rare circumstances.
- Course exams will be reviewed within 3 days (usually within 1), for scoring errors and partial credit. It is possible that scores will go up, but never down.
- Each course exam will count as 20% (for a total of 40%) of your overall grade.
- The lower of the two course exam percentages will be replaced by the final exam percentage if the final exam percentage is higher.

FINAL EXAM

- There is a comprehensive final exam in this course (covering material from both course exams).
- The final exam is built from the practice final (which is built from the two course exams).
- There will be a two-hour (120 minute) time limit on the final exam, and it will be proctored.
- The final will be taken on a computer using Hawkes at a proctoring site.
- You must arrive at the correct answer to receive credit. Partial credit will only be awarded in rare circumstances.
- The final exam will be reviewed within 3 days (usually within 1), for scoring errors and partial credit. It is possible that scores will go up, but never down.
- The final exam will count as 35% of your overall grade (55% if higher than the lowest course exam grade).

FAILURE TO TAKE THE FINAL EXAM WILL RESULT IN FAILURE OF THE COURSE

A LAST WORD

Algebra is not a spectator sport; it requires active participation and PRACTICE. You can “study,” you can “review,” and you can watch someone do examples; however, above all else, you must PRACTICE. There are no assignments in the course that are meant as "busy work." They have been created for each section of material, and are intended to prepare you for the quizzes and exams. They are VERY useful and powerful tools, as the quizzes, and exams will be built from these assignments.

ADA AND STUDENT DISABILITY SERVICES:

The University of Mississippi is committed to ensuring equal access to an education for enrolled or admitted students who have disabilities under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (ADA). The office serves those with physical, nonphysical, and mental disabilities. University policy calls for reasonable accommodations to be made for eligible students with verified disabilities on an individualized and flexible basis.

It is the responsibility of any student with a disability who requests a reasonable accommodation to contact the Office of Student Disability Services (662-915-7128) in 234 Martindale Center to be verified with that office. SDS will then contact the instructor through the student by means of an Instructor Notification of Classroom Accommodations form. For more information, please visit their website at <http://www.olemiss.edu/depts/sds>.

M BOOK: ACADEMIC DISHONESTY / Plagiarism:

You should not share your private personal passwords (for your Blackboard account or for your email) with anyone else, including brothers or sisters, boyfriends or girlfriends, or parents. Logs of all your activity within the Blackboard course environment, including the Internet location from which you are accessing Blackboard, are available to the instructor and to the Independent Study office. Any evidence of logins to a student's Blackboard course by someone other than the student will be treated as an act of academic dishonesty and will result, at minimum, with failure in the course; the student may also be subject to the more severe disciplinary actions outlined in The University Policy on Academic Dishonesty. (ACA.AR.600.001)

Academic Dishonesty is expressly prohibited by The University of Mississippi. See [The University of Mississippi's M Book](#). This includes plagiarism and self-plagiarism. Plagiarism is not only prohibited by the university but it could also be a legal offense (ex: copyright, infringement, fraud, etc.).

- Self-plagiarism is defined as re-using a paper written for another class and submitting it in whole or part for credit in another class, without obtaining permission from the instructor prior to the submission of the paper.
- Plagiarism is harder to define, but it boils down to representing someone else's ideas as your own.

To be absolutely clear, working with another person to answer submitted questions or any of the test questions is unacceptable. If it is determined that any student has violated this policy, the instructor will take the appropriate steps under The University of Mississippi's Academic Dishonesty policy. These range from failing the course to being suspended from The University of Mississippi.

If you have any questions about plagiarism please consult the web links below or contact the iStudy office.

- The Online Writing Lab at Purdue has a great site on Plagiarism, including a checklist for students: <http://owl.english.purdue.edu>
- Another good website is How Not to Plagiarize by Margaret Procter, Coordinator of Writing Support, University of Toronto. <http://www.writing.utoronto.ca/advice/using-sources/how-not-to-plagiarize>
- See "Plagiarism in Colleges in USA" by Ronald B. Standler at <http://www.rbs2.com/plag.htm> for more information about potential legal issues.

SUGGESTIONS FOR INDEPENDENT STUDY STUDENTS:

Set aside a regular time for studying and preparing your lessons.

- Submit the lessons at regular intervals.
- Review constantly. Do not merely submit new material and permit the old to stagnate.
- Note carefully the the mistakes you made when reviewing your quizzess/practice exams/exams. If you have difficulty understanding the explanations given, never hesitate to ask for help.
- Do not hesitate to contact your instructor about any difficulties you may have or any phase of the work you may not understand.

You can contact your instructor in one of these ways:

1. Contact your instructor **directly** by using the Email Your Instructor link to send an email via Blackboard. You can usually expect a reply within 24 hours, except on weekends when it may take longer.
2. Contact your instructor **indirectly** by sending a written message or email message to the instructor in care of the iStudy department (istudy@olemiss.edu). Your message will be promptly forwarded to the instructor.

Do not let unanswered questions keep you from getting the maximum out of each lesson.
