# Pi Mu Epsilon

The mathematics honors society for university students

Thursday, April 21, 2016
12:15-12:50 PM in Hume 201

Speaker: Dr. Maksym Derevyagin
Title: *Let's Get Rational!*

I am going to discuss continued fractions, which are expressions used to represent real numbers, and Diophantine approximations. The latter deals with problems such as whether a given real number is rational or irrational; if the number is irrational then the problem is to determine how well it can be approached by rational numbers.

**A one-time payment of $10 covers your pizza lunch
for all meetings this semester!**

See you Thursday!
