Your Course ID: Longla61693

Time/Place: Per class announcement

Course Description
This course covers topics of multivariable calculus, including partial derivatives, multiple
integrals and vector calculus (chapters 12, 13, and 14). One of the goals of this course is to
enhance students’ critical thinking and analytical reasoning abilities. Students who successfully
complete this class will be able to undertake the main courses related to their majors with full
command of the required mathematical tools and to apply concepts and theories learned in
class to solve some real application problems. Additionally, mathematics majors should be
adequately prepared to continue their education in higher-level courses where the concepts of
calculus are examined in abstract form with full precision.

Learning Objectives:
The course is a culmination of the sequence of Calculus and addresses the main topics of the
Calculus: the Derivative and the Integral, in the case of functions of several variables. The
students who complete the course successfully should be able to undertake the main courses of
their chosen major with the full command of the required mathematical tools. Additionally,
Mathematics majors should be adequately prepared to continue their education in higher-level
courses where the concepts of Calculus are examined in abstract form with full precision.

Testing Information:
• Class attendance – Attendance is mandatory. A total of 4 absences is
equivalent to automatic failure. The student is expected to sign in
using the automatic attendance system that requires personal id. It is
the responsibility of the student to bring his id every class day.

- Weekly homework assignments totally worth 100pts. Homework problems will be assigned online after the last class meeting of the week.
- Quizzes will be assigned every class day and due before the next class meeting (check regularly). The quizzes will count for 50pts.
- There will be 3 midterm exams counting for 100pts each and a final exam counting for 200pts. No make-up tests will be given. Each of the tests will have two parts (1 online and 1 in class).

**Grade letters and scores**
A: 580-650 (includes A and A-), B: 520-579 (Includes B-, B and B+), C: 460-519 (includes C-, C and C+), D: 400-459, F: 000-399. I reserve the right to make the grading scale easier.

**Calculator Policy**
An inexpensive scientific calculator is sufficient in Math 264 but is not necessary. Calculators will NOT be allowed during exams or quizzes. While I cannot stop you from using a calculator at home; I encourage you to do the homework without a calculator. Calculators, cell phones, ipods, and other electronic equipment are prohibited during exams.

**Additional Policies**
1. Any person who must miss a scheduled mid-term exam or quiz because of an official university function must reschedule with the instructor to take the test at a time before the test is scheduled to be given. No other rescheduling will be allowed. If asked for by the instructor, official documentation must be provided.
2. A student who wishes to discuss the grading policy and/or testing policy, or wishes to have a conversation regarding the instructor of the course should make an appointment with the course supervisor in the Department of Mathematics.
3. An _I_ grade will not be given without the permission of the Department of Mathematics.
4. Any student having three or more final exams scheduled for the same day may arrange with the instructor to take the exam at another time. This is the only reason that a final exam may be rescheduled.
5. Every student must take each exam at the time scheduled. The only exceptions are those students affected by (1) or (4) above.

**Course Withdrawal**
The withdrawal deadline is October 3\textsuperscript{rd}, 2017. After the Course Withdrawal Deadline, courses dropped will be recorded on University records and the W grade will be recorded if the student is not failing the course at the time of withdrawal; otherwise the grade recorded will be F. After the course withdrawal deadline, a student may drop a course only in cases of extreme and unavoidable emergency as determined by the academic dean; dropping a course after the deadline will not be permitted because of dissatisfaction over an expected grade or because the student is changing his/her major.

**Academic Needs**

It is the responsibility of any student with a disability who requests a reasonable accommodation to contact the Office of Student Disability Services (915-7128). That office through the student will then make contact with the instructor of this class. The instructor will then work with the student so that a reasonable accommodation of any disability can be made.

**Academic Honesty**

Cheating: The following statement is the policy of the Department of Mathematics regarding cheating:

Offenses: Cheating on any exam or quiz, theft or attempted theft of exam questions, possession of exam questions prior to the time for examination, or the use of an illegal calculator on tests or quizzes shall all be offenses subject to appropriate penalties.

Penalties: The penalty for commission of any offense set out above is failure in the course and, subject to the approval of the Chancellor, dismissal or suspension from the University.
