Course Information
Instructor: Dr. Thái Hoàng Lê.
Office: Hume Hall 337.
Office hours: MT 1:00-2:00pm, F 10:00-11:00am, or by appointment.
Email: leth@olemiss.edu.
Time/Place: MWF, 09:00am - 09:50am, Hume Hall 331.

Course Description
This course is the third semester of a four-semester calculus sequence at the University of Mississippi. The course will cover material in chapters 8, 9, 10, and 11 of Briggs, Cochran and Gillett’s Calculus Early Transcendentals, namely: sequences and infinite series, power series and Taylor series, parametric equations and polar coordinates, vectors and vector-valued functions.

Course Learning Objectives
Our objective is to enable students understand concepts, develop problem solving skills, apply concepts and theories learned in class to solve problems, prepare for higher level courses, and enhance both critical thinking and analytical reasoning abilities.

Schedule of lectures
The following is a tentative schedule of lectures. It is subject to change (depending on our actual pace in class).

<table>
<thead>

</table>
**Homework**

Homework assignments will be electronically assigned on MyMathLab (http://www.pearsonmylabandmastering.com/) and due every week, generally on Wednesdays. See the attached hand-out for additional information. Any late MyMathLab assignments may be submitted by 11:59 pm on Friday, November 30, 2018 for half-credit. A number (to be determined later) of lowest homework scores will be dropped. It is extremely important to do homework assignments, since not only do they contribute to your final grade, but they also help you understand the concepts, hone your skills, and prepare you for the exams.

**Quizzes**

There will be three quizzes throughout the semester (dates to be determined). The lowest quiz score will be dropped.

**Attendance**

Attendance is not mandatory but strongly recommended. I won’t reply to questions asking what is announced or covered in classes you miss. It is your responsibility to know what you miss and you must have contacts of some other students in class so that you may inquire them. **Note that students who do not attend class within the first two weeks of the semester may be dropped from the roll.** Attendance verification is done by scanners available in the classroom.

**Grading**

1. Your final grade is determined by homework (15%), quizzes (5%), midterms (60%, each worth 20%), final exam (20%). Your lowest midterm score will be replaced by your final exam score, if the latter is higher.

2. There are no make-up exams or quizzes.

3. Your letter grade is based on the following scheme: F for below 60, D for 60 or above, C- for 70 or above, C for 73 or above, C+ for 77 or above, B- for 80 or above, B for 83 or above, B+ for 87 or above, A- for 90 or above, A for 93 or above.

**Calculator Policy**

Calculators will NOT be allowed during exams. While I cannot stop you from using a calculator on homework assignments, I encourage you to do the homework without a calculator.

**Additional Policies**

1. Each student is responsible for work missed due to absences. If a test is missed, a grade of zero will be given.

2. Any person who must miss a scheduled test or quiz because of an official university function must reschedule with the instructor to take the test at a time before the test is scheduled to be given. No other rescheduling will be allowed. If asked for by the instructor, official documentation must be provided.

3. A student who wishes to discuss the grading policy, testing policy, or wishes to have a conversation regarding the instructor of the course should make an appointment with the course supervisor in the Department of Mathematics.

4. Any student having three or more final exams scheduled for the same day may arrange with the instructor to take either the 12:00 noon or 7:30 p.m. exam at another time. This is the only reason that a final exam may be rescheduled. The student is required to take the final exam at the time scheduled.

**Course Withdrawal**

Withdrawal deadline for the 2018 Fall semester is Monday, October 1. After the course withdrawal deadline, courses dropped will be recorded on University records and the W grade will be recorded if the student is not failing the course at the time of withdrawal; otherwise the grade recorded will be F. After the course withdrawal deadline, a student may drop a course only in cases of extreme and unavoidable emergency as determined by the student’s academic dean. Dropping the course after the deadline will not be permitted because of dissatisfaction over an expected grade or because the student has changed his or her major.
**Tutoring**

Free tutoring for all courses through Calculus 4 (115, 120, 121, 123, 125, 261, 262, 263, 264, 267, & 268) will occur in the J.D. Williams Library Commons. The Commons is on the bottom floor of the J.D. Williams Library. No appointment is necessary. A desk worker is stationed near the reference desk and can point you in the direction of a tutor. Tutoring hours are listed below.

- Sunday: 6pm-9pm
- Monday: 10am-9pm
- Tuesday: 10am-9pm
- Wednesday: 10am-9pm
- Thursday: 10am-9pm
- Friday: 10am-2pm

**Academic Needs**

It is the responsibility of any student with a disability who requests a reasonable accommodation to contact the Office of Student Disability Services (915-7128). Any request for extended testing time made through that office must be made prior to the date of the test.

**Academic Honesty**

The following statement is the policy of Department of Mathematics regarding academic honesty: Cheating on any exam, quiz, classwork, or homework, theft of exam questions or possession of exam questions prior to the time for the exam shall all be offenses subject to the appropriate penalties. The penalty for commission of any offense set out above is failure in the course, and subject to the approval of the Chancellor, dismissal or suspension from the university.
To register for Math 263 - Section 1:

2. Under Register, select Student.
3. Confirm you have the information needed, then select OK! Register now.
4. Enter your instructor’s course ID: le64645, and Continue.
5. Enter your existing Pearson account username and password to Sign In.
   You have an account if you have ever used a MyLab or Mastering product.
   » If you don’t have an account, select Create and complete the required fields.
6. Select an access option.
   » Enter the access code that came with your textbook or that you purchased separately from the bookstore.
   » If available for your course,
     • Buy access using a credit card or PayPal.
     • Get temporary access.
7. From the You’re Done! page, select Go To My Courses.
8. On the My Courses page, select the course name Math 263 - Section 1 to start your work.

To sign in later:

2. Select Sign In.
3. Enter your Pearson account username and password, and Sign In.
4. Select the course name Math 263 - Section 1 to start your work.

To upgrade temporary access to full access:

2. Select Sign In.
3. Enter your Pearson account username and password, and Sign In.
4. Select Upgrade access for Math 263 - Section 1.
5. Enter an access code or buy access with a credit card or PayPal.
