Number Theory Seminar

Friday, September 11th, 2020

11:00 am on Zoom

Felipe Gonçalves

Universität Bonn

Sign Uncertainty

ABSTRACT

We will talk about recent developments of the sign uncertainty principle and its relation with sphere packing. The talk will mainly be a report of the paper New Sign Uncertainty Principles (arxiv.org/abs/2003.1077), joint work with J. P. Ramos and D. Oliveira e Silva. The talk should be accessible to graduate students.
